

# GRAIN AND FERTILISER STACKER

## Safely and efficiently handle and store bulk commodities with our industry-leading Grain and Fertiliser Stacker

Our mobile bulk commodities stacker and drive over grid (DOG) is designed and manufactured by MHM Automation and supplied for use worldwide. 100 units are operating globally.

Grain and Fertiliser Stackers are built for safe and reliable operation. They can be folded and transported on standard road-going trucks to relocate to new sites as required.

### APPLICATIONS

- › Transferring wheat, grain and fertiliser from trucks to stockpile up to 9 metres high

### BENEFITS

- › High throughput – 600TPH
- › Easy and safe to operate
- › Manoeuvrable and relocatable
- › Transportable

## FEATURES

- › Operated from control platforms with weather protection canopies
- › All controls are mounted on the machine and fully interlocked for operator safety
- › Self-contained and powered by their own diesel generator
- › Optimum weight distribution using DOG as a counterweight, eliminating the need for concrete counterweights
- › Four-wheel drive and two-wheel steering
- › Manual jacking system incorporated into the chassis for raising stacker/boom off the wheels for packing and maintenance
- › Folds easily and fits onto standard road-going transport, not requiring escorting on highways
- › Easy to assemble and set up
- › Meets all AU/NZ/ME safety standards
