

WINE AND BEER TANKS

Custom designed and fabricated tanks for the viticultural industry.

MHM Automation has been a trusted fabricator of stainless steel tanks for more than 100 years. Respected for our mechanical and project engineering capabilities, we provide comprehensive design, fabrication, installation and commissioning services to a broad range of industry sectors.

We offer custom-designed and built tanks for the wine industry, ranging in capacity from 2,500 to one million litres. All our tanks are manufactured to meet stringent quality and safety standards for the New Zealand and Australian markets.

APPLICATIONS

- › Fermentation and storage of wine and other beverages
- › Suitable for small or large-scale operations

BENEFITS

- › Bespoke design available to suit your process and location
- › Meets NZ/AU safety standards
- › ISO 9001 certified quality management system
- › Project security – as a market leader in stainless steel fabrication and supply, MHM Automation will provide engineering, project management, installation, maintenance and warranty
